## SHARES RELATED TO EVENT PRESS RELEASE

### QUOTAS - ALESSANDRA LOCATELLI, MINISTER FOR DISABILITIES

*Minister for Disabilities, Alessandra Locatelli brings greetings for the presentation of the scholarships that Global Thinking Foundation wanted to dedicate to the world of sports and in particular to the world of Paralympic sports in the wonderful setting of Bari, especially a greeting with lots of affection for Claudia Segre and all those who have dedicated themselves every day for so many years, to improve the quality of life of so many people, including women and not least people with disabilities. He added: 'I thank you for your attention because it is at this time of great change, especially on the issue of disability, that we need to enhance and hold together the issue of life time, recreational time and also sports time. This is a great challenge that you have been able to take up and by joining forces we can start to have a different perspective, to see in each person what are the potentials and not the limitations, the skills, the qualities, the talents and to invest in those from the institutional point of view, from the third sector world - which already does it in an exemplary way - and in the private world and individual citizens. Thank you for all that you do and greetings to all participants and best of luck to the scholarship winners.*
